

Essay Writing - 300 Words

Textbooks should be replaced by computers and online resources.

Textbooks should be replaced by Online Resources We live in the era of 21st century, and it is the time to take the step in whole world with technological advances. Nowadays, most of the children love to use the internet for many purposes, but still they carry heavy backpacks with lots of textbooks. There are many reasons for why textbooks should be replaced by today's latest technological tools.

Textbooks have become a burden for all students across the world. As technology advances, leaning styles have become more technology dependent which makes the students more accustomed to technological devices. Some schools have traditional thinking that textbooks are the only way to go perfectly, but on the other hand online resources are more sensible alternative.

School districts should replace textbooks with online resources in order to reduce stress for the students, save the district resources, and endure a longer period of time than textbooks. Although online resources can be frustrating and slow if it is overloaded with applications, they are much easier to use for a student.

Computers and online resources have been of great importance in the society. These two items have been of major importance in the education system. However, there has been an intense debate on the use of either the items or abandoning one. Due to advancement in technology, there is a need to replace textbooks with tablets in the current society and the education system.

Books have no substitute I believe, they are the best accomplices but when we talk about textbooks, it means a load or heap, students carrying on their backs. Days are gone when people believed in plenty of books, scratch pads, and notebooks. We are living in an innovative

world where everything is technological. The most fitting substitute for textbooks is laptops, tablets, and notebook computers which are compact, light and are easy to use. Every year more than 4 billion trees are cut down for making papers, notebooks, and workbooks. By practicing laptops in our schools, universities, we can get cleaner, natural and fresh air as there would be no longer cut down of trees.

So, Textbooks should be replaced by computers and online resources.
